Updates & Insights

By Sandeep Manoharan, CEO

One thing that continues to stand out in our industry is that progress rarely comes from a single big change. It comes from hundreds of smaller improvements better processes, stronger systems, faster execution, and technology that can keep pace with the way businesses operate.

At Rupeeseed, this belief has shaped the way we build. We look beyond individual features and requirements to understand how each piece fits into the larger technology landscape of a broker or financial institution. The goal is not simply to introduce more technology, but to make technology work better for the people and businesses using it.

The past month has been another step in that direction, with developments across our platforms, regulatory implementations, and operational capabilities. Our participation at the ANMI NR – Fintech Show, Delhi also gave us an opportunity to step outside our day-to-day work and listen to the challenges, priorities, and expectations of the industry.

These conversations are important because they keep us grounded in what matters: building technology that is relevant today, dependable in practice, and ready for what comes next.

I hope you enjoy this edition and find it a useful reflection of the work and progress taking place across Rupeeseed.

Sandeep Manoharan

Co-Founder & CEO

ANMI NR, FINTECH Show Delhi *Glimpse*

DELHI

Insights, Interactions & Industry Perspectives

Rupeeseed was delighted to be part of the ANMI FINTECH Show, Delhi, held on 26th September 2026.

The event brought together key stakeholders from across the capital markets and fintech ecosystem, creating an opportunity to engage in insightful discussions, exchange industry perspectives, and understand the evolving priorities of brokers and financial institutions.

The discussions highlighted how technology, innovation, and adaptability continue to play an important role in building a more connected and efficient financial ecosystem.

Product Level Enhancement | **Trading**

Pre-Open Session Enhancement

Structured order entry and automated market-status handling

The pre-open session gathers all those orders first and calculates one fair opening price, so trading starts in a more orderly way.

The pre-open runs from 9:00 AM to 9:15 AM, split into following parts:

1. Limit & Market Order Entry
2. Only Limit Order Entry
3. Order matching
4. Buffer Period

Pre-Open Session Timeline

The pre-open session runs from 9:00 AM to 9:15 AM and is divided into the following stages:

1 — 9:00 - 9:05 AM

Limit & Market Order Entry

Traders can place, modify, or cancel both limit and market orders during this period.

2 — 9:05 - 9:10 AM

Only Limit Order Entry

Only limit orders can be placed, modified, or cancelled. Market orders are not allowed.

3 — 9:10 - 9:12 AM

Order Matching & Trade Confirmation

The exchange matches all eligible orders to determine a single fair opening price.

4 — 9:12 - 9:15 AM

Buffer Period

A brief buffer period ensures a smooth transition before regular trading begins at 9:15 AM.

Rupeeseed's platforms now support the above Pre-Open functionalities, along with the required Order Management capabilities across the respective front ends. Market statuses are automatically managed through the Admin interface, helping ensure smooth and efficient operations for clients.

Regulatory Update

Backoffice

01 Strengthening Regulatory Compliance Across CDSL & NSDL

7 DP regulatory circulars were successfully implemented in our systems August 28, 2026, across CDSL- and NSDL-enabled DP Back Office environments, enabling timely compliance and seamless regulatory adoption.

02 UDiFF Catalogue Enhancements Implemented

UDIFF enhancements were implemented in the Trading Back Office, including the introduction of the Darpan ID in UDIFF Catalogue Version V3.0.1.2, along with enhancements to the NSDL Depository System effective August 28, 2026.
