Updates & Insights

By Sandeep Manoharan, CEO

A Message from the Leadership

At Rupeeseed, we believe technology should do more than meet today's requirements; it should anticipate tomorrow's challenges. As the capital markets evolve, our focus remains on building solutions that help brokers operate more efficiently, scale with confidence, and stay prepared for change.

This month, we are highlighting advancements across our technology ecosystem. From RupeeCORé's next-generation OMS architecture to PMS Digital Onboarding and Class R Reporting, our focus is on simplifying operations and delivering a more seamless experience for our clients.

Beyond product innovation, we continue to strengthen our approach to system reliability, intelligent automation, and regulatory readiness. By anticipating challenges and building with a forward-looking mindset, we aim to help our clients stay ahead in an increasingly dynamic industry.

Our vision remains simple: technology that anticipates, adapts, and empowers.

Sandeep Manoharan

RupeeCORé: Built for Speed, Resilience & Scale

RupeeCORé is Rupeeseed's next-generation OMS architecture, engineered for sub-10 ms performance, seamless execution, and scalability in demanding trading environments. Built for speed, resilience, and efficiency, it empowers brokers with a robust technology foundation designed for modern capital markets.

Sub-10 ms Performance

Consistently delivers ultra-low latency with high throughput during peak market conditions.

Cloud-Compatible by Design

Architected for seamless deployment across modern, scalable cloud environments.

Memory-First Execution

In-memory execution engine designed to avoid synchronous database and I/O overhead.

Resilience at Every Layer

Built with fault tolerance and redundancy across all processes and components.

Precision Service Orchestration

Service-based, modular architecture using modern frameworks enabling independent scaling, deployment, and execution.

Infrastructure Cost Efficiency

High-throughput architecture delivering significant infrastructure cost savings at scale.

Onboarding

PMS Digital Onboarding

One platform for every PMS client.

From lead to e-signed account, Innodigital simplifies PMS Onboarding with a fully integrated, secure and flexible platform. It is designed to support diverse client categories, including Individual, Joint, Corporate/LLP, NPDMS, DPMS, and Advisory clients.

Digital KYC
PAN, CKYC, DigiLocker

Integrated
KRA, Depositories, Bank & Exchanges

e-Sign
Fully Online & Paperless

Flexible
Single or Multi-tenant

A Smoother Onboarding Journey

End-to-End Digital Onboarding that helps PMS firms acquire and activate clients faster.

1

Capture & Verify
Client details, digital KYC and identity verification. (PAN, CKYC, DigiLocker)

2

Integrate & Process
Seamless integration with KRA , bank and depositories for automated processing.

3

Activate
e-Sign, account set-up and ready for investment, all online.

Simplifying PMS Onboarding Through Technology

InnoDigital brings the entire PMS onboarding journey onto one integrated platform, combining digital identity verification, AI-powered checks, bank validation, Aadhaar e-Sign, and seamless integration with depositories and exchanges. The platform offers a secure, flexible, and fully digital onboarding experience designed to streamline operations and simplify client account activation.

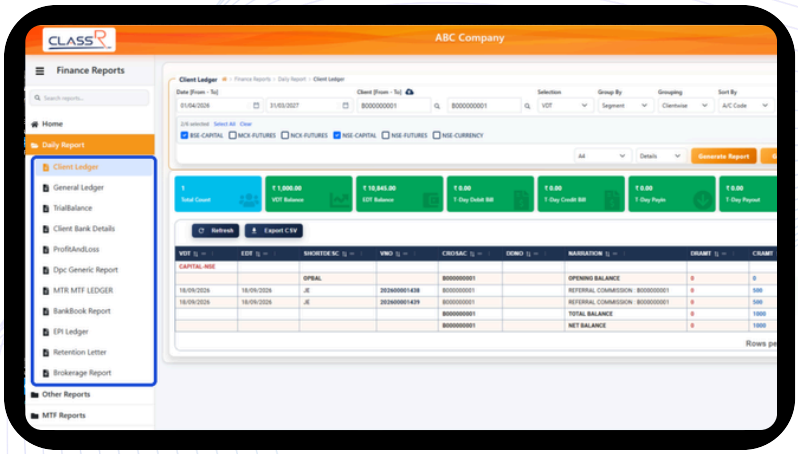
Back Office

Class R: Next-Generation Reporting



Report Builder & API Driven Reports

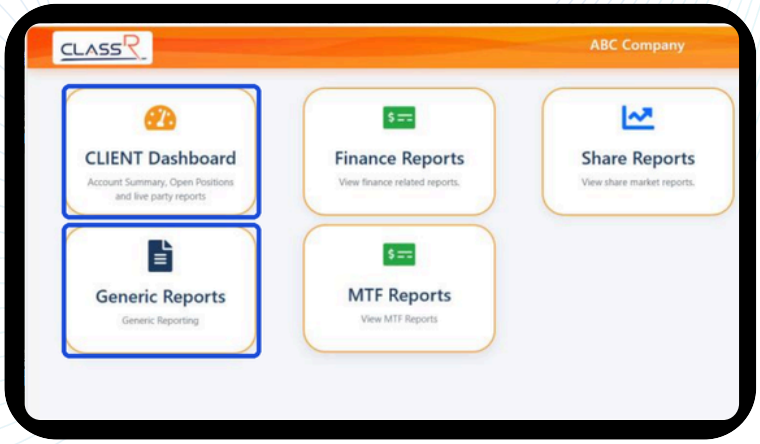
Class R is our next-generation reporting application, built for faster data retrieval and a seamless user experience. Its Report Builder lets users customise reports to their business needs: select or deselect columns, choose the information to display, and create personalised reports. Each individual report runs on its own API, enabling efficient data retrieval, quicker processing and faster access to business-critical information.

Every Report, One Smart Platform

Designed to meet diverse client requirements, Class R brings all report families together in a single, easy-to-navigate hub. Users can access Finance, Share, Delivery, Utility and MTF reports without switching between systems.

Key highlights:

- Client Dashboard: an instant view of account summary, open positions and live party reports in an intuitive, visually appealing interface.
- Generic Reports: flexible, general-purpose reporting that sits alongside every specialised report, all from one platform.



Stay tuned for more updates ahead!!
