Enhancing Trading Experience

By Sandeep Manoharan, CEO

As we move forward into a new phase of growth and innovation, we're excited to share the latest updates and enhancements that continue to shape our solutions at Rupeeseed. This newsletter highlights the new features, including advanced options trading tools, streamlined reporting capabilities, enhanced client-level restrictions, and updates to ensure smooth handling of regulatory changes.

With all these product enhancements and regulatory updates, Rupeeseed is growing and expanding to ensure that we continue providing the best-in-class solutions and services for our clients. As we embrace this growth, we remain focused on our mission to ensure your success.

"Growth is never by mere chance; it is the result of forces working together." At Rupeeseed, we are committed to working with you, side by side, to achieve lasting success and deliver excellence in every solution we offer.

Thank you for your continued trust and partnership.

Newsletter Highlights

- Enhanced Client-Level Restrictions with Ready Template
- New File Upload Utility Tool
- Backend Update: Sliding Price Band Error Handling
- Payout Management for Dealers in TWS
- Improved Net Position View for Options
- Bulk Order Entry for Derivative Spread Contracts
- Rupeeseed at Stocktech 2024-25
- Upcoming Events & Updates in January 2025

ENHANCED CLIENT-LEVEL RESTRICTIONS WITH READY TEMPLATE

Our system now allows the configuration of value-based and quantity-based restrictions at the client level using the Ready Template. These restrictions can be applied at the combined exchange level, across all segments, and for all instrument types. This is in addition to validations that can be defined at individual or per-exchange levels, per product level, and per segment level for a specific client or a group of clients.

NEW FILE UPLOAD UTILITY TOOL

The new File Upload Utility Tool enables the extraction of various day-to-day reports, such as Client Limit File, EDIS, Position Conversion, Fund Pay-IN, etc., eliminating the dependency on the Admin Panel.

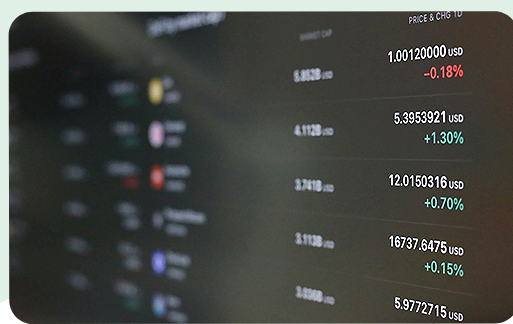

BACKEND UPDATE: SLIDING PRICE BAND ERROR HANDLING

Handling of new error codes at backend level has been implemented, as introduced by NSE for the Equity and Derivatives segments. These codes address Sliding Price Bands and cancelling outstanding orders that fall outside the revised price bands.

PAYOUT MANAGEMENT FOR DEALERS IN TWS

Dealers can place cash withdrawal requests on behalf of clients directly from the Trader Workstation (TWS). This feature supports clients who primarily trade through dealers or authorized persons. Dealers can also view all payout requests through a report.

IMPROVED NET POSITION VIEW FOR OPTIONS

The Trader's Workstation (TWS) includes additional filters for In-the-Money (ITM), Out-of-the-Money (OTM), and At-the-Money (ATM) options in the Net Position screen. This is beneficial for dealers as it allows them to monitor specific option positions such as ITM options which require additional margins.

BULK ORDER ENTRY FOR DERIVATIVE SPREAD CONTRACTS

TWS introduces bulk order placement for spread contracts in the derivatives segment, allowing dealers to roll over positions during expiry across multiple clients in a single screen.

RUPEESEED AT STOCKTECH 2024-25

We were thrilled to participate in StockTech 2024-25 at NESCO Center, Goregaon. The event was a great success, with an amazing response and valuable connections with industry experts. We appreciate everyone who dropped by to connect with us!

Upcoming Events & Updates in January 2025:

The Pre-Apply and AMO features for IPOs and other line items will be incorporated into next month's coverage.
