VOL. 28 | APRIL, 2025

## Tech Enhancements & Regulatory Readiness

By Sandeep Manoharan, CEO

As we move into a new financial year, our focus remains committed to delivering impactful innovations. We have introduced significant platform enhancements, including an enhanced watchlist experience, lien setup, and real-time pledge verification, to name just a few.

On the regulatory front, we continue to align closely with SEBI's latest mandates. Our systems are promptly updated to ensure brokers deliver a seamless experience to their clients while staying fully compliant.

Thank you for your continued trust in Rupeeseed as we advance towards a smarter, more agile capital market ecosystem.

## NEWSLETTER HIGHLIGHTS

### ► Product-level Enhancements

- Integration of CDSL Inquiry API for Margin Pledge Verification
- Lien Integration Extended to Bank of India
- Margin Trading Facility (MTF) as a Standalone Segment
- Unified Holdings View in Mobile App
- Smarter Watchlist Management

### ► Regulatory Update

- Business Continuity for Interoperable Exchange Segments

## Product Enhancements: Trading Platform

### INTEGRATION OF CDSL INQUIRY API FOR MARGIN PLEDGE VERIFICATION

We have integrated CDSL’s Inquiry API to help members verify the real-time status of margin pledge requests at the depository level to ensure timely margin benefits for clients.

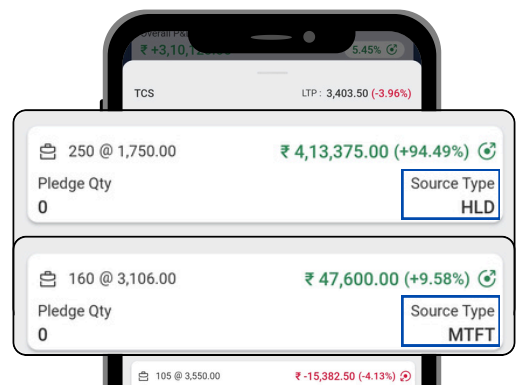

### LIEN INTEGRATION EXTENDED TO BANK OF INDIA

Lien setup is now live for Bank of India customers. This is in addition to the existing lien integration which is already in place for banking brokers like Yes Securities, Standard Chartered Securities, Bank of Baroda, Jammu & Kashmir Bank etc.

<input type="checkbox"/>	ALL	TEST	MTF	TATAMO...	TATA M

### MARGIN TRADING FACILITY (MTF) AS A STANDALONE SEGMENT

Members offering Margin Trade Funding (MTF) can now operate it as an independent segment, similar to Equity, F&O, Currency or Commodity. This allows viewing and computing margins, collaterals, fund details and other components separately.

### UNIFIED HOLDINGS VIEW IN MOBILE TRADING APP

With the latest version of our mobile app users can tap any scrip in the portfolio to instantly view its source-wise holding details—BTST, DP, CUSPA, and others, bringing more clarity to portfolio.

## Product Enhancements: Trading Platform

### SMARTER WATCHLIST MANAGEMENT

Users can now select and delete multiple scrips at once from the watchlist in our Trader Workstation (TWS), enabling faster and more efficient watchlist management.

## Regulatory Update

### Business Continuity for Interoperable Exchange Segments

In line with SEBI's directive to ensure uninterrupted trading during exchange outages, a new interoperability mechanism has been introduced between NSE and BSE.

#### Under this framework:

- BSE will act as an alternative trading venue for NSE, and vice versa, in the event of a system outage.
- Both exchanges will create reserve scrips and contracts for instruments exclusively listed on the other exchange, enabling continued trading if disruptions occur.

We have enabled the seamless integration of daily security and contract master files, including cross-listed instruments into client systems during beginning-of-day (BOD) processes, with support of files provided by both exchanges.

More exciting updates ahead as we remain committed to delivering better solutions for you.
